20/30 Webinar Series

# BearBuy Terminology

# Internal vs External Attachments

- Both internal and external attachments are visible in BearBuy to any BearBuy user with the appropriate viewing access.
- Do not upload any document in BearBuy, *unless* private information and the home & family data is blacked out and **completely unreadable**.

## **Internal Attachments**

The Internal Attachments section allows attachment of necessary supporting documents. Attachments in this section will not be sent to the supplier.

## **External Attachments**

The External Attachments section provides another location for adding supporting documents. Attachments in this section **are** distributed to the supplier via fax or email.

The screenshot displays the BearBuy interface with two main sections: "Internal Notes and Attachments" and "External Notes and Attachments". The "Internal" section includes items like "Buyer Intervention Needed" (marked with a red 'x'), "BluCard Holder" (no value), "Internal Note" (no note), and "Internal Attachments [Privacy Warning]". The "External" section includes "Note to all Suppliers" (no note), "Attachments for all suppliers [Privacy Warning]", and "PO Clauses". Both sections have "edit" buttons. A sidebar on the left shows a navigation menu with options like "Internal" and "External Attachments [Privacy warning]".

Internal Notes and Attachments ?	External Notes and Attachments ?
Buyer Intervention Needed <span style="color: red;">x</span> <input type="button" value="edit"/>	Note to all Suppliers <span style="color: gray;">no note</span> <input type="button" value="edit"/>
BluCard Holder <span style="color: gray;">no value</span>	Attachments for all suppliers [Privacy Warning]
Internal Note <span style="color: gray;">no note</span>	<a href="#">add attachment..</a>
Internal Attachments [Privacy Warning]	PO Clauses <span style="color: gray;">edit clauses...</span>

# Supplier Fulfillment vs Remit To Address

## ***Fulfillment Address***

- A fulfillment address (also called an order address) is the supplier specified address that will fulfill the order. Some suppliers have more than one fulfillment address.
- A Shopper or REQ Creator can edit the fulfillment address if more than one exists for a supplier. When processing transactions in BearBuy, Shoppers and REQ Creators will be able to view and edit fulfillment addresses for a supplier.

## ***Remit To Address***

- A remittance address is where payment for the supplier invoice is sent.
- Accounts Payable will select from the supplier's remittance addresses when creating the voucher to ensure the payment is sent to the address listed on the supplier invoice. Only Voucher Preparers are able to view and edit the remittance addresses when entering the voucher.

# Hosted vs Punch-Out Catalog

## ***Hosted Catalog***

- Hosted Catalog suppliers provide UCB a price file. The file is then uploaded to BearBuy. These price files contain pictures, descriptions and prices for all negotiated items the supplier carries.
- When users 'shop from the top', they are searching hosted catalogs.

## ***Punch-Out Catalog***

- Punch-Out Catalog suppliers create a UCB custom website containing all products at UC negotiated prices.
- To access a punch-out, click the supplier's sticker and a new window will open.
- Any punch-out catalog items will not display dollar amounts when 'shopping from the top.'

# Submit vs Assign

## ***Submitting a Cart***

- Users can click the submit button when the requisition is ready for submission.
- The requisition will be sent to the appropriate step based on the Org Node entered on the cart.
- Once the requisition is submitted, you can check the status at any time using the ***View My Orders*** link within the Shop menu icon.

## ***Assigning a Cart***

- Users can click the assign button when the requisition needs to be seen/approved by another individual not on the official workflow.
  - This includes budget officers, Principle investigators, Managers, Budget Managers, etc.
- The individuals who receive these assigned carts are called Cart Authorizers.
- Cart Authorizers can edit the cart before they submit the cart.

# Header vs Line

## ***Header***

- When the term header is used, it references information at the top level of the transaction.
- Information included in the header level will apply to each individual line as long as the line information is not altered.

## ***Line***

- When the term line is used, it references information at the individual line level.
- Changing information at the line level only affects the line in question.

# Header vs Line

Summary
Shipping
Billing
Asset Management
Accounting Codes
Supplier Info
Taxes/S&H

Hide value descriptions

Shipping ?

These values apply to all lines unless specified by line item

**Ship To**

	Delivery Options (same as header)						

# Active vs Draft Cart

- Both Active and Draft carts are carts that have not been officially submitted into workflow.
- Once submitted, active/draft carts are called Purchase Requisitions (PR).

## **Active Cart**

An active cart is the cart you are currently adding items to and/or editing. BearBuy highlights the active cart so it's easier to identify the active cart vs draft cart. You can select a new active cart by clicking the cart icon in this column.

## **Draft Cart**

A draft cart is a cart you are not currently adding items to and/or editing. These are carts you created but have not submitted yet. You can have multiple draft carts at a time.

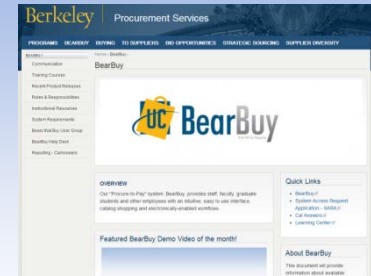

My Drafts		
Active Cart	Cart Number	Shopping Cart Name
	53731610	<a href="#">2014-08-29 011814427 01</a>
	53726650	<a href="#">TRV for C.Prado</a>
